

I strongly object to the apparent ongoing agenda within the FCC to support any rights-abridging policy the RIAA and MPAA wish to push through to fatten their pockets. These two organizations have consistently pushed to blur the lines of fair use of copyrighted materials, and are gradually eroding the rights we have to any copyrighted materials. If they had their way, we'd pay everytime we listen or view, even if we bought the music, movie, etc.

Say no to this corporate hegemony. Serve the people you are supposed to, not the corporations trying to leverage this nation into a corporate state. I am opposed to Notice of Proposed Rulemaking #02-230, and wish to officially voice my opinion that this rule should NOT be enacted.
